

Attention & Warning

You are being warned of a massive attack of U.S. citizens that is going on at this moment all across the country. Evidence of the activity has been discovered through technical research proving that this is in fact true.

For approximately six years there have been reports from people throughout this country claiming that they have been under attack in their homes from radio frequency electronic weapons that cause effects that decrease the immune system, also these reports include that many of these people are implanted with covert devices causing extreme pain are also being reported.

You and your family members may also be victims of this same activity, some of the initial symptoms are very common such as insomnia, acid reflux and many others, the radio frequency energy also causes physiological changes that cause syndromes and disease of all kinds including heart attack because the technique of attacks is radio frequency which causes immune system and physiological chemical changes in the body leading to illness. This means you or your family member could have such symptoms or be sick from this same widespread covert activity. So its suggested that you read this very careful and take it very seriously as your lives and the future of this country may hinge upon your actions as a result.

It has been widely reported in NYC Metropolitan newspapers such as Newsday and others just 7 years ago that large amounts of money equivalent to trillions of dollars by today's standards have been invested in U.S. pharmaceuticals and other industries of the U.S. towards the end of WW II. The United States Intelligence Networks have been proven to be infiltrated by old guard Nazi German Intelligence Agents since that time. We also have evidence that this entity had sought and is enacting revenge on the U.S. With these attacks on covert electronic attacks on U.S. Citizens for the bombing Germany and Hitler into dust; their efforts over the years inside government have been realized by their introduction of policy that low brow civil servants have all to willingly blindly and ignorantly followed in obeying as they carry out these attacks on our citizens.

There is technical evidence to support the fact that people are indeed being attacked with electronic weapons in their homes without regard to their economic, social, or economic status demographically and includes men, women, and children as the victims. It appears they are exhibiting the total control that they have upon the United States at this time, where such illegal acts are occurring with impunity. The entity in control has prevented the reporting of this activity in the media and has apparent control of policy where authorities such as police and FBI are ignoring this activity of the whole sale torture and execution of people in their homes using this technology. Such a control over the United States has been accomplished through the infiltration in particular by way of policy makers in the department of Justice.

You are receiving this information because those attacked had presumed it was human experimentation from U.S. agencies known to be doing human experiment activity, however those attacked blatantly out in the open in front of family, friends and community have attempted to take action in the courts but have had their cases been dismissed despite evidence. This implies that such widespread attacks are being sanctioned where they are entirely against the concept of what our country stands for; coupled to the research by those attacked that there has been a widespread infiltration by Nazi Intelligence at the end of WWII, supports the conclusion that has been policy insertion permitting torture of citizens in public without arrest or trial from top to bottom of the government. That such atrocities where Americans are being tortured to death in their homes is going unreported by the media has resulted in the fact that it is necessary for this information letter to be handed to you so that you will know what is going on.

A reliable test has been found that can detect this advanced technology, it is an IEEE International Standard SAR test that determines there is electrical energy from radio frequency origin occurring in a persons body. This test device is reliable in that it detects such energy and is indisputable; the Center For Disease Control and other Safety Agencies of the Government clearly state what maximum safe levels of electrical energy are permissible to be in the body (which is .01 milliamp) and that victimized persons from these attacks exhibit levels of energy from the attacks just under the levels that can cause immediate death (being 35 – 112 milliamp's).

The reason for giving you this information is as you would imagine, that we as Americans know that you would be highly interested in such crimes against us U.S. Citizens. When such crimes have been reported to police, The FBI, or other Law Enforcement Agencies it is totally ignored despite evidence illustrating that such atrocities are going on. This means at this moment your Country is keeping you in the dark on purpose while there is an activity of public executions without trial going on across this nation.

An investigation was begun some six years ago after the author of this letter was attacked with high energy electronic weapons, the motive is believed to have been because he was going public with his corporation with the Securities and Exchange Commission to raise money for a patented construction technology; upon looking into it more deeply he discovered widespread attacks going on against U.S. Citizens in all demographics from the poverty stricken to millionaires, from children to the elderly, from activists to the politically disinterested, from atheists to the religious; this activity is going on right now in every neighborhood both suburban and urban of this nation. This requires exposure in having this information sent to as many people as possible because the media will not report this due to their complicity in keeping it a secret.

As one might imagine there has been diabolical care in devising the technology to do this to people so the the activity could remain secret, it was only through the expenditure of a tremendous amount of time and money that a detection technology was discovered. The resultant discovery of the proper detection technology is unfortunate that the device that does the detecting is expensive and out of reach for most people to purchase, it is laboratory grade equipment. This very issue that it requires an expensive laboratory instrument to detect the attack energy in a person will greatly slow down the process of proving that this is going on to the average person and may in fact result in further critical time passing that will allow those who are attacking Americans to bring into play some means of reducing their exposure to the "public" at large (such as war and marshal law with heavy censorship). This would mean that they the attacks could continue without opposition by the public (because they were not told and are ignorant of its existence); the public at large is the only group in the country that could possibly bring this genocide to a halt.

We ask you to spread the word as quickly as possible to as many people as you can and to people, even to people that you do not know by copying this information and handing it out or calling them on the phone. Also if you can afford to buy one of the laboratory instruments to use on yourself, your family and others do so; this will also help in spreading the word because the all the profits from the sale of this instrument goes to spreading the word, that will result we are sure in the exposure, prosecution, and punishment of those responsible. It is everyones responsibility to do as much as possible to stop covert public executions in this country, we know it sounds impossible that such things could be going on right under our nose, but we today know from recent times that the media has not reported many unusual things that are going on as an example of how this issue as well could go unreported by the media.

You are invited to read further information on the website <http://www.mdspec.com> to learn first hand from many thousands of people being attacked overtly in public throughout the country. A number of these people have done research to illustrated that there are many millions of people who have actually died of these attacks throughout the nation, where they who have died simply thought that they were sick from natural causes. Doctors as you will find are ill equipped with their training to be able to diagnose such as is going on to an individual, Doctors can be wrong

and do not even know about this test.

Without your looking into this, finding out the truth, taking action; there will be little chance that this will come out in the media, because as we say they themselves are controlled to remain silent and the genocide will continue indefinitely without massive numbers of the U.S. public knowing about this activity and then taking action to stop it. www.mdspec.com
